Fall Protection Stand Down

Please join us to help raise awareness in preventing fall hazards in construction.

Falls are the leading cause of death in the construction industry, with hundreds of workers dying each year and thousands more facing catastrophic, debilitating injuries. Over the past ten years, nearly 3,500 construction workers died from falls, contributing to almost half of the fall fatalities for all industries combined. Lack of fall protection remains OSHA's most frequently cited violation.

What is a Safety Stand-Down? A Safety Stand-Down is an event to raise awareness about fall hazards. This Stand-Down focuses on "Fall Hazards" and reinforcing the importance of "Fall Prevention".

Who Can Participate? Anyone who wants to prevent falls in the workplace can participate in the Stand-Down.

Consider Reviewing your Fall Prevention Program

What types of falls could happen:

- Falls from ladders
- Falls from a roof
- Falls from a scaffold
- Falls down stairs
- Falls from a structural steel
- Falls through a floor or roof opening
- Falls through a fragile roof surface

What needs improvement?

- Is your program meeting its goals?
Are you experiencing fatalities, injuries, or near misses? Are employees aware of the company's fall protection procedures?
- What training have you provided to your workers? Does it need revision?
- What equipment have you provided to your workers? Is better equipment available?
